

AHMED MOHAMED ATTIA

Front-End Developer | Software Engineer

AttiaX125@gmail.com | 01100074690 | Hadayek El Ahram, Giza, Egypt
linkedin.com/in/ahmed-attia-b299952b0 | github.com/AttiaX125

PROFESSIONAL SUMMARY

Results-driven Front-End Developer with a B.Sc. in Mechatronics Engineering (Grade: A+) and hands-on production experience building responsive, accessible web applications with React, JavaScript (ES6+), TypeScript, and modern CSS. Proven ability to deliver client-facing UIs, interactive dashboards, and RESTful API-integrated apps from scratch while meeting WCAG accessibility standards. Brings an engineering problem-solving mindset, team leadership, and mentoring experience. First-place winner of Egypt's national EVER Electric Vehicle Rally.

EXPERIENCE

Front-End Developer

July 2024 – Present

Andalusia Village (Real Estate Tech Platform) | Egypt

- Built and maintained responsive, accessible (WCAG-compliant) web interfaces using React, JavaScript (ES6+), and Tailwind CSS — reducing reported UI bugs by ~40% and improving mobile usability across 5+ key pages.
- Collaborated with designers and back-end engineers to build 10+ reusable UI components, reducing code duplication by ~25% and cutting average feature delivery time.
- Optimised asset loading and lazy rendering, achieving measurably faster page load on low-bandwidth connections for a user base of 1,000+ monthly visitors.
- Integrated RESTful APIs and consumed Node.js/Express endpoints to serve live property listings, search filters, and dynamic content — improving data freshness and UX.

STEM Instructor

December 2024 – Present

Core West College | El Sheikh Zayed

- Delivered STEM workshops in coding, robotics, and critical thinking to 25+ students per semester — achieving 95%+ student satisfaction rating.
- Guided students through hands-on Arduino and sensor projects — achieving 90%+ project completion rate.
- Designed curriculum materials and translated complex technical concepts into clear, age-appropriate explanations.

Team Leader — Suspension & Steering

2022 – 2023

EVER (National Electric Vehicle Competition) | Pyramids, Egypt

- Led a 6-member team to design and fabricate suspension and steering systems using SolidWorks CAD and structural simulations.
- Managed timelines, testing phases, and on-site troubleshooting across 3 competition rounds.
- Secured 1st place in Egypt's national EVER Electric Vehicle Rally — team's first national championship.

Flight Maintenance Engineer (Trainee)

Jan 2018 – Feb 2018

EASA | 6th of October Airport

- Completed intensive training in aircraft mechanical, electrical, and electronic systems under strict safety procedures.
- Operated and monitored navigation instruments with high attention to detail and accuracy.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js (SSR/SSG), jQuery, Sass, Tailwind CSS, Bootstrap

State & Routing: React Hooks, Redux Toolkit, Zustand, React Router, Context API

Testing & Quality: Jest, React Testing Library, cross-browser testing, accessibility testing (WCAG / a11y), responsive design

Tools & Platforms: Git, GitHub, Vite, Webpack, REST APIs, Node.js (API consumption), Chart.js, Figma (design handoff), CI/CD (GitHub Actions)

Engineering: Embedded Systems (C++, Arduino), SolidWorks, Ansys, Python

Soft Skills: Team leadership, Problem-solving, Critical thinking, Attention to detail, Mentoring

LANGUAGES

Arabic — Native | English — Professional / Fluent | German — Beginner (A2)

CURRENTLY LEARNING

GraphQL | Docker | Storybook | PWA (Progressive Web Apps) | Web Performance Optimization (Core Web Vitals)

CERTIFICATIONS

Frontend Dev with React.js — 2025

React, JS ES6+, HTML5, CSS3, Git, API integration, React Hooks, React Router

Embedded Systems Diploma — 2022 | IMT

C++, Microcontroller Architecture, Real-Time Systems, Hardware Debugging

PROJECTS

Prosthetic Arm — EEG-Controlled (Thesis, Grade A+) [\[github.com/AttiaX125\]](https://github.com/AttiaX125)

- Designed the Middle East's first EEG-controlled smart prosthetic arm as a Mechatronics Engineering thesis.
- Implemented real-time EEG signal processing pipeline for gesture recognition; ergonomic 3D-printed prototype focused on natural motion, comfort, and user accessibility.

Tech: Python, EEG signal processing, embedded hardware, Arduino, 3D prototyping

E-Commerce Product Page (Mini Store) [\[github.com/AttiaX125\]](https://github.com/AttiaX125)

- Fully responsive, accessible storefront with dynamic product listing, real-time search, and category filtering built with React functional components and hooks.
- Persistent local-storage shopping cart — items survive page refresh without a backend; keyboard-navigable UI meets a11y / WCAG compliance standards.
- Optimised re-renders using React.memo and useCallback; modular component architecture enables easy feature extension.

Tech: React, JavaScript (ES6+), HTML5, CSS3, Local Storage, React Hooks

Admin Dashboard with Real-Time Charts [\[github.com/AttiaX125\]](https://github.com/AttiaX125)

- Responsive admin dashboard featuring 4+ interactive Chart.js chart types (bar, line, doughnut, radar), KPI summary cards, and toggle-based data filtering.
- Consumed a public REST API to populate live metrics; implemented loading states, error boundaries, and empty-state fallbacks for production-grade UX.
- Designed for non-technical stakeholders — intuitive drill-down into live metrics with zero technical knowledge required; cross-browser tested on Chrome, Firefox, and Safari.

Tech: React, Bootstrap, Chart.js, REST API, JavaScript (ES6+)

Weather App — Real-Time API Integration [\[github.com/AttiaX125\]](https://github.com/AttiaX125)

- Fetches live weather data from OpenWeatherMap API with city-based search, 5-day forecast view, and robust error handling for invalid queries and network failures.
- Responsive mobile-first layout with skeleton loading states and fast API response handling; deployed via GitHub Pages with CI/CD workflow.

Tech: JavaScript (ES6+), OpenWeatherMap API, HTML5, CSS3, GitHub Actions

Authentication System (Sign In / Sign Up) [\[github.com/AttiaX125\]](https://github.com/AttiaX125)

- Responsive auth pages with real-time inline validation for email format, password strength (strength meter), and field completion — reducing form abandonment.
- Session persistence via localStorage with secure field masking, clear error feedback, and accessible form labels meeting WCAG 2.1 AA guidelines.

Tech: HTML5, CSS3, JavaScript (ES6+), Local Storage

Personal Developer Portfolio — Next.js [\[github.com/AttiaX125\]](https://github.com/AttiaX125)

- Built a performant, SEO-optimised personal portfolio using Next.js (SSG) with dynamic project pages, smooth scroll animations, and a contact form wired to an email API.
- Achieved 95+ Lighthouse score across Performance, Accessibility, Best Practices, and SEO; fully responsive across mobile, tablet, and desktop breakpoints.

Tech: Next.js, TypeScript, Tailwind CSS, Framer Motion, Vercel

Task Manager App — Redux Toolkit + TypeScript [\[github.com/AttiaX125\]](https://github.com/AttiaX125)

- Full-featured task management app with drag-and-drop Kanban board, priority tagging, due-date tracking, and filter/search — built with Redux Toolkit for global state.
- Written entirely in TypeScript with strict typing; unit-tested core reducers and UI components using Jest and React Testing Library with 80%+ code coverage.

Tech: React, TypeScript, Redux Toolkit, Jest, React Testing Library, Tailwind CSS

EDUCATION

B.Sc. in Mechatronics Engineering

Nile University, Egypt

Thesis: Prosthetic Arm Using EEG Signals | Grade: A+

2024
